IN CABINET DISTRIBUTED I O

<b>Component type</b>	
<b>Range</b>	440T Time-delay
<b>Model</b>	N/A
<b>Product status</b>	Existing

The Allen-Bradley 440T Electronic Timed-delay Unit Trapped Key Interlock Switches are ideal for applications requiring an elapsed time to occur before access to a hazardous area. A combination of Guardmaster® SI and EMD safety relays execute the timing sequence by turning a non-removable key, when the EMD times out an internal solenoid is energised allowing the removal of the trapped keys.
